Carolyn Brennan noted that the Board of Health had already performed a review and posted the new permit fee structure on the Board of Health web page.

5.2 Eversource Upcoming Solar Project

Representatives from Eversource discussed with a visual aid the proposed solar installation project on their property at 55 Russell Street. The solar installation would generate up to 2.9 GWH of clean solar power annually. The project would include a parking lot canopy, rooftop

installation, and ground-mount solar. There would be a battery energy storage system as well. During power outages, the solar power would be used on site as clean backup power for emergency response activities. Excess power is sold into the wholesale market and would generate revenues to benefit Hadley. Property tax revenue would increase for the Town based upon a new assessed value of the Eversource property after the project has been completed.

Eversource requested a letter of support from the Select Board. DPU would have final approval authority to move forward after public hearings and further research. A similar project does exist in Yarmouth.

Randy Izer pointed out that the Planning Board and Conservation Commission would have to review and approve physical growth plans at the site.

One of the early tasks for the Committee is to review the 5 possible sites for construction.
