FARMER'S ROUNDTABLE

Friday, March 22, 2024 at 3 p.m.

Plainville Farm, 135 Mount Warner Road, Hadley, MA 01035

We are hosting a public meeting for local farmers and farm workers to share ideas on climate change and its impact on our crops.

Each growing season is getting warmer and rains are becoming more erratic and intense. How can we concentrate on better irrigation or better drainage? How do we keep diseases from destroying our crops? How can we protect our employees while they work in the heat? How can we adapt to changing and rising summer heat waves?

If you have any answers to these questions or more questions, please join us and help us as growers.

There will be reps from FSA and NRCS to offer ideas. We hope to have people available to answer questions as well.
